

Slovenia builds energy storage power station

Overview

Why is there no new power plant construction in Slovenia?

Several decades of no new major power plant construction in Slovenia has driven the country, as well as some other countries, to a situation where the gap between consumption and production of electricity has become significant. The issue has become so serious that energy and climate policy has been placed at the top of all political debates.

How many hydropower plants will Slovenia have by 2045?

Another pumped storage hydropower plant is seen by 2045. It would be able to generate 180 MW and store 2.6 GWh. The Integrated National Energy and Climate Plan envisages an overall 500 MW in gas power plants in Slovenia by the end of the decade.

What are the major developments in the renewables sector in Slovenia?

The main developments in the renewables sector include the introduction of the National Energy and Climate Plan and the adoption of secondary legislation, aiming to make Slovenia a climate-neutral society in the coming decades and motivating private finance to invest in projects including renewable sources.
