

Small solar on-site energy outdoor energy storage inverter

Overview

What is a goodwe ES series bi-directional energy storage inverter?

The GoodWe ES series bi-directional energy storage inverter can be used for both on-grid and off-grid PV systems, with the ability to control the flow of energy intelligently. During the day, the PV array generates electricity which can be provided either to the loads, fed into the grid or charge the battery, depending on the economics and set-up.

What is a goodwe a-es solar inverter?

The GoodWe A-ES Series is a split-phase hybrid inverter designed to increase self-consumption of your generated solar energy. GoodWe A-ES is compatible with high voltage (80-495V) batteries with a power capacity ranging from 5 kW to 9.6 kW. With up to 4 MPPTs, the A-ES inverter seamlessly adapts to complex residential rooftops.

What is a goodwe BT series inverter?

The GoodWe BT series is an AC-coupled retrofit inverter, which is able to upgrade existing three-phase on-grid PV systems to storage systems. The AC-coupled solution can transform any three-phase on-grid PV system into an energy storage system with batteries, enhancing grid independence and self-consumption.

What makes Ehb a good inverter?

Supporting up to 50A battery charge/discharge current, EHB can easily supply power to critical loads when the grid is compromised. It is AFCI-ready and can support rapid shutdown function. All these outstanding features make this inverter a perfect match for application in South African households.
