

Sodium battery solar container energy storage system price

Overview

What is energy storage sodium battery technology?

In the energy storage sodium battery technology, the sodium ion battery has better performance at high and low temperatures. The capacity retention rate is 70% at - 40°C, and it can be recycled at 80°C. At the level of energy storage system, the air conditioning power quota can be reduced, and there is room for cost reduction.

Is sodium-ion battery suitable for solar energy storage?

The sodium-ion battery developed in this work is suitable for solar energy storage because it has advantages of long cycle life, low cost, and materials abundance over lithium-ion batteries. It also has the feasibility for large-scale production using the existing infrastructure of lithium-ion batteries.
