

Solar PV panels save costs

Overview

How much money can you save with solar panels?

Most homeowners save around \$50,000 over 25 years. Solar panels require an upfront investment but provide significant savings on energy bills over time. Depending on your area's electricity costs, you could save between \$37,000 and \$148,000 over 25 years with solar panels.

Are solar panels a good investment?

Solar panels require an upfront investment but provide significant savings on energy bills over time. Depending on your area's electricity costs, you could save between \$37,000 and \$148,000 over 25 years with solar panels. The higher your local electricity prices, the greater your potential for solar savings.

Do solar panels save money on electricity bills?

The amount of money that you save on your electricity bills when you install solar panels depends on the size of the solar power system you install. Larger systems are able to collect more sunlight, thereby increasing the amount of electricity they produce.

Do solar panels save money in California?

With an average of 5.5 peak sun hours per day, solar panels in California produce plenty of power—but the real savings come from escaping some of the highest electricity prices in the country. In 2024, California's average electricity rate was around \$0.28 per kWh—nearly double the national average.
