

# **Solar container communication station voltage 185V**

## Overview

---

What is the MV power station inverter compartment?

The MV POWER STATION's inverter compartment includes two standard service platforms and two standard sun protection roofs. When transporting to overseas countries, the transformer compartment is also equipped with service platforms and protection roofs, and additional base plates are installed in the shipping container.

How many low-voltage meters can a station subdistribution board have?

The station subdistribution board and circuit breakers for the control unit can optionally be equipped with up to two low-voltage meters. In addition, communication components such as Communit can be integrated.

What is a medium-voltage switchgear?

For optimal user protection, the medium-voltage switchgear contains the standard internal arc classification IAC AFL 20 kA 1s according to IEC 62271-200. For larger PV farms, the medium-voltage switchgear can also be equipped with an daisy-chain control.

## Solar container communication station voltage 185V
