What is a solar fan?

A solar fan is a mechanical fan powered by solar panels. The solar panels are either mounted on the device or are installed separately – normally on a roof. Solar fans generally do not require power sources other than solar power from a solar panel, as most of them are used for cooling purposes during day time.

What is a solar powered ceiling fan?

White solar-powered ceiling fan with white steel blades. Runs directly from the solar panel, and provides a breeze all day when the sun is shining and runs slower when there are clouds. Model SCF-56 – Solar powered Ceiling Fan with 1400 mm diameter, white steel fan blades, hung weight is 9.1kg.

What are solar powered roof fans?

Solar Powered Roof Fans are a smart and environmentally sensible solution that protect your home, your roof, and save you money by helping cool your home in summer. This electrically powered, mechanical roof fan is a great way to provide maximum air flow and extend the life of your roof.
