

# Solar glass carrier

## Overview

---

What is carrier glass technology?

AGC's Carrier Glass Technology is a groundbreaking solution for handling and processing ultra-thin glass (UTG). It overcomes a key challenge associated with UTG's incredible thinness and flexibility - its delicate nature makes it difficult to integrate into existing manufacturing processes without damaging the material 1.

What is a large-sized carrier glass?

AGC offers large-sized carrier glass technology using large-format glass produced by the float process, to meet the growing demand for large-scale applications and improve process efficiency through large substrates. This capability enables manufacturers to process larger sheets of UTG without compromising quality or efficiency.

What is photovoltaic smart glass?

Photovoltaic glass, also known as solar glass or transparent solar panels, is a type of smart glass that uses embedded photovoltaic cells to convert sunlight into electricity to generate electricity.

What makes Acht a top Photovoltaic Glass manufacturer?

The company is a prominent player in the photovoltaic glass market, offering ultra-clear rolled glass and TCO glass essential for solar energy applications. ACHT's advanced technology, R&D system, and extensive corporate culture have solidified its position as a top photovoltaic glass manufacturer.
