

Solar house glass roof

Overview

Emerging from traditional solar panel designs, solar glass roofs integrate photovoltaic cells directly into the roofing material, allowing for picture-perfect integration in modern buildings. What is a solar roof?

Solar Roof is comprised of both glass solar tiles and steel roofing tiles. Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection.

What is a Tesla Solar Roof?

Enhance your home's appearance with the sleek and contemporary design of the Tesla Solar Roof. Generate the most energy possible, even on roofs with complicated angles and intermittent sunlight. Glass solar tiles and architectural-grade steel tiles, vent covers, and ridge caps come together to form a roof that is both durable and powerful.

What is a Solarglass Roof?

The Solarglass Roof is made of transparent tempered glass that is three times more durable than conventional roof tiles. It has the highest ratings in hail (Class 4), fire (Class A) and windproof (Class F) tests, demonstrating excellent durability.

Can a solar roof power a home?

Install Solar Roof and power your home with a fully integrated solar and energy storage system. The glass solar tiles and steel roofing tiles look great up close and from the street, complementing your home's natural styling. Schedule a virtual consultation with a Tesla Advisor to learn more.
