

# Solar lights for small lighting

## Overview

---

What are the different types of solar lights?

Solar lights can be used purely for ambience and decoration, or can have a more practical function such as illuminating a path or providing security lighting. Some of the most popular types include: Fairy lights: Think of the lights on a Christmas tree - they have small, dim LEDs, narrowly spaced along a wire, and are ideal for decorative lighting.

Are solar lights good for your garden?

Solar lights are environmentally friendly lighting and with a good set, you can create an ambience that lets you enjoy your garden long after dark. Powered by solar panels, they absorb daylight and convert it to electrical energy, charging your lights so they're ready to go at night.

What are solar lights used for?

Spotlights: These solar lights are used for lighting up a single area or highlighting trees and shrubs. They also double as security lights, as they're good for dark spots that could use brief bursts of bright light, like the front of sheds when you're locking or unlocking a door, or alleyways when you're putting the bins out.

Are solar powered mini lights a good idea?

They are ideal for those who want to get rid of traditional electricity powered lights. They're affordable, kid-friendly, easy to use, and easy to store as well. You can use solar powered mini lights as decoration anywhere and anytime - at weddings, parties, birthdays, and during the holiday season.
