

# Solar panel prices in Malabo

## Overview

---

How are solar panels priced?

Solar panel installations are priced according to the size of the system you want, the type of roof (i.e. complexity of the job), where you are located, the brand of panels/inverter you want, and more. Here's a general price guide for different system sizes when fully installed:

How much do solar panels cost in Australia?

Last Updated 19 Mar 2025 · Written by hipages team · 8 min read As a guideline, the average cost of solar panels in Australia starts as low as \$3,500 for a budget 3kW system, up to \$22,000 or more for a large 20kW system, which includes around 45 panels.

How much does a 450W solar panel cost?

The average 450W panel costs around R3,600. Yes. Makro's 450W and 330W panels come with a 12-year product and 24-year performance warranty and use Tier-1 cells. They offer excellent value for money and are widely used in residential installations. A complete 5kW solar system (panels, inverter, batteries, installation) costs approximately R120,000.

How much does a 10kW Solar System cost?

For larger systems, such as a 10kW system, you can expect to pay between \$6,990 and \$13,290. Just bear in mind that your final price will vary based on where you are located, your chosen system's size and your installer's labour rates.
