Overview

What are the different types of solar panels?

Discover the six main types of solar panel, including thin-film, perovskite, and the best type for your home: monocrystalline. What kind of home do you live in?

When you're considering whether to get solar panels, it's a good idea to look into all the different types, to ensure you choose the best system for your home.

What are polycrystalline solar panels?

Polycrystalline solar panels are one of the oldest types of solar panel in existence, and now account for 0% of global production, according to the National Renewable Energy Laboratory (NREL). Their cells are made by melting multiple silicon crystals and combining them in a square mould.

What are the different types of solar panels for UK homes?

The most common types of solar panels for UK homes are monocrystalline and polycrystalline, both made from silicon.

What types of solar panels should you choose?

As solar technology has progressed, there are now more options than ever before to choose from. For most residential and commercial applications, monocrystalline and polycrystalline solar panels are ideal because they're pretty efficient and long lasting. For specific installations, thin-film panels work great.
