

Solar panels can be directly installed on the roof of the factory

Overview

Can solar panels be installed on a factory roof?

The roofs of factories are often the ideal place to install solar panels. As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it.

Can a commercial solar power system fit a factory or warehouse roof?

Commercial Solar power systems can be customised to fit factory and warehouse roofs' specific design, size, and energy consumption profile, maximising energy capture and efficiency.

Can a business install solar power plants in a factory?

Due to this factor, businesses can choose to install either rooftop solar power plants or ground-mounted solar projects in their factories. In rooftop solar systems, solar panels are mounted on the roof of the building. In contrast, ground-mounted solar projects use large open land space for the mounting panels.

Where can solar panels be installed?

They can directly install an integrated solar InRoof where solar panels function as the primary roof. This Ornate InRoof structure is completely leakproof and can be installed over large open areas such as industrial sheds, warehouses, as well as smaller areas such as rooftop restaurants, carports, corridors, and pergolas, etc.
