

Solar panels for exterior walls

Overview

Which properties are best suited to wall-mounted solar panels?

Properties that are most suited to wall-mounted solar panels are ones that have large south-facing walls, which aren't covered by any shade. South-facing panels are exposed to sunlight throughout the day, which is especially handy for wall-mounted solar panels, given their performance is already hindered by their limited angle.

Can solar panels be mounted on walls?

Solar panels mounted on walls are emerging as one of the revolutionary and realistic options in the realm of clean energy. Solar panels can now be installed straight onto vertical walls, turning mere building surfaces into electric powerhouses.

Are wall mounted solar panels suited for residential and commercial use?

Wall mount solar panels are best suited for residential and commercial use. With the increasing demand of solar, technological advancements making it more efficient and cost effective everyday. Let's explore the working of wall mounted solar panels, the benefits of installing solar panels on walls and how they are different from rooftop solar.

Should I get wall-mounted solar panels?

You should only get wall-mounted solar panels if you have a large south-facing wall, and you're unable to mount them on your roof. Since most roofs are already at an angle, they're usually the optimal place to place solar panels - not to mention they're the highest point of the property.
