Overview

Do solar panels produce more energy than a home needs?

Solar panels can produce more energy than your home needs. In that case, the extra solar energy can be sent back to the utility grid or stored in a battery system for later use. There are three main types of solar power systems: grid-tied, hybrid, and off-grid systems, which we explain in the videos below. How do grid-tied solar systems work?

.

What is solar energy & how does it work?

Solar energy is a renewable, sustainable, and increasingly popular way to generate electricity for homes, businesses, and off-grid applications. This guide provides an in-depth overview of how solar panels work, the key components of a solar power system, and practical advice on installation, maintenance, and troubleshooting.

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.
