

Solar panels in the northwest of the Middle East

Overview

Will solar power grow in the Middle Eastern Region?

With several projects under construction or in the tender phase in countries like Saudi Arabia and the United Arab Emirates, considerable growth in solar PV is expected to drive the solar power market in the Middle Eastern region over the forecast period.

Is the Middle East embracing solar energy?

The Middle East's embrace of solar energy is unfolding at an unprecedented scale. Once almost entirely reliant on oil and gas, the region is now pouring billions into solar infrastructure, setting some of the most ambitious renewable energy targets in the world. Saudi Arabia has placed solar energy at the center of its economic transformation.

How many solar panels are installed in the Middle East in 2022?

Photovoltaic (PV) solar panels held a share of more than 96.57% of the total Middle Eastern solar energy installed in 2022. The solar PV installed capacity of the Middle East grew to 12.440 GW in 2022, which is higher compared to the 9.239 GW installed in 2021.

What is the Middle East solar power market?

The Middle East Solar Power Market is Segmented by Technology (solar photovoltaic (PV) and concentrated solar power (CSP)) and Geography (Saudi Arabia, the United Arab Emirates, Oman, and the rest of the Middle East). The report offers the market size and forecasts in installed capacity (gigawatts) for all the above segments.
