

# **Solar panels lighting solar container battery**

## Overview

---

What is shipping container solar lighting?

Shipping container solar lighting will be your best solution. No cords to worry about and no worry about losing power. The shipping container solar lighting system is very simple and maintenance free. The 12V battery provide power to the LED lights and the solar panel provide power to the battery through the charging controller.

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.

What is a solar panel battery pack?

A solar panel battery pack is a package that makes up the solar power storage in a solar system. The first items in the pack are the solar panels that help to collect sunlight energy and change it into DC electricity.

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.
