

Solar panels on rooftops in the south of Paris

Overview

Is France a good country for rooftop solar?

France remains one of the top performing countries when it comes to the development of Rooftop solar policy and practices, but deliverables still need to be achieved. France's photovoltaic (PV) policies are developed within the National Low Carbon Strategy and the Energy Programme Decree.

Why is solar PV mandatory in France?

Mandatory solar: Solar PV is mandatory for living roofs for commercial and industrial buildings or covered car parks occupying 500 m² or more of ground surface. Power to the people: France's current policy framework is supportive of collective self-consumption and energy communities, with flexible regulations supporting prosumers.

How much PV capacity does France have in 2023?

Overall there has been significant growth in PV capacity within France, with around 2,229 MW added to the grid between January-September 2023, reaching a cumulative capacity of 19.0 GW of installed PV capacity. However, there are issues to the lack of construction capacity and training and employment in the sector.

How has the energy sector changed in France?

Energy communities are being promoted, with legislation simplification and encouragement for the growth of citizen energy initiatives. Overall there has been significant growth in PV capacity within France, with around 2,229 MW added to the grid between January-September 2023, reaching a cumulative capacity of 19.0 GW of installed PV capacity.

Solar panels on rooftops in the south of Paris

Urbasolar Launches France's Largest Rooftop Solar Project

Sep 25, 2024 · Urbasolar has launched France's largest rooftop solar project in Beauvais, an installation covering 62,000 square meters and generating 13 GWh annually. The project will ...

The Paris solar register

To meet its renewable energy target, the City is encouraging the development of solar power in its territory. But in a high-density urban ...

2,200 m² of solar panels will soon be installed in the heart of Paris!

It's an unprecedented project set to come to life right in the heart of the capital. In just a few months, hundreds of solar panels are expected to be installed on the roof of one of Paris's ...

The rooftops of Paris

5 days ago · Today, the rooftops of Paris include 3,500 greened roofs of over 100 square metres and 674 roofs equipped with a solar energy producing system.

On Rooftops of Paris, Expect Green Roofs and Solar Panels

Green rooftops will soon be sprouting up across France, thanks to a new law passed in March. New buildings in the country's commercial zones - think shops, offices, and restaurants - must ...

Photovoltaic Rooftops

A rooftop photovoltaic system is a solar energy installation mounted on residential, commercial, or industrial roofs, converting sunlight into electricity. In France, rooftop PV is a key driver of the ...

France Rooftop Solar Country Profile

Apr 15, 2024 · Scoring System This country profile highlights the good and the bad policies and practices of solar rooftop PV development within France. It examines and scores six key ...

The Paris solar register

To meet its renewable energy target, the City is encouraging the development of solar power in its territory. But in a high-density urban setting such as Paris, where can solar panels be ...

Solar PV Analysis of Paris, France

Aug 3, 2022 · Maximise annual solar PV output in Paris, France, by tilting solar panels 42degrees South. In Paris, France, situated at latitude 48.9335 and longitude 2.3661, solar power ...

Rapid decarbonisation of Paris, Lyon and Marseille's power, ...

Jun 1, 2023 · The falling price of solar PV panels in recent years has led to a growth in the uptake of self-consumption (decentralised) solutions such as rooftop solar PV. Although still modest,

...

Urbasolar Launches France's Largest Rooftop ...

Sep 25, 2024 · Urbasolar has launched France's largest rooftop solar project in Beauvais, an installation covering 62,000 square meters and ...

Solar PV Analysis of Paris, France

Aug 3, 2022 · Maximise annual solar PV output in Paris, France, by tilting solar panels 42degrees South. In Paris, France, situated at latitude ...

French Rooftop Solar Tender Falls Short, Prices Drop

May 31, 2025 · Why did France's rooftop solar tender fall short of its 400 MWp target? Roof-Load Restrictions: Many commercial and industrial buildings have structural limitations that prevent ...
