

Solar panels residential facilities and prices

Overview

How much does a residential solar system cost?

Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400. Regional pricing differences, the system size, local installation costs, inclusion of home battery backup, and local incentives are other factors which affect the final cost.

How much does solar cost per square foot?

Average U.S. solar cost per square foot in 2025: \$6 – \$12 after the 30% federal tax credit. Cost per square foot varies by system size, energy use, location, and panel efficiency. The most accurate pricing metric is still cost per watt, but per-sq-ft estimates are helpful for ballpark figures.

How much does a 6 kW solar panel installation cost?

The average 6-kW residential solar panel installation is \$17,852 before incentives. Learn about cost factors, financing options, tax breaks and more.

How much does a solar system cost in 2024?

In 2024, the average cost for a solar panel installation is about \$2.50 to \$3.50 per watt. For example, a 6 kW system might cost between \$15,000 and \$21,000 before any tax credits or incentives. Cost After Incentives: Federal and state incentives can significantly reduce the cost of your solar project.
