

Solar power generation with 18 5 kW water pump

Overview

What is a 15 hp water pump solar inverter?

15hp water pump solar inverter with MPPT control, AC 25A output at 3-phase, rated power 11kW, and DC voltage range (280V, 750V). 15 hp solar pump inverter with RS485 communication and IP20 protection, supports AC and DC input, works at (-10°C, 40°C).

What is a solar pump inverter?

18.5 kW (25 hp) solar pump inverter / solar variable frequency drive, built-in MPPT controller, intelligent track maximum power point, automatic regulation of pump flow, converts DC 450V-750V from the solar panel to 3-phase AC voltage.

What are solar energy-powered water pumps?

Solar energy-powered water pumps are water pumps running on the electricity that is generated by solar energy. For generating solar power, solar photovoltaic (PV) systems are used for complementary energy sources, they are deployed alongside diesel pumps in areas with plenty of sunshine and where the cost to run power lines is high.

How much power does a solar AC pump have?

At present, the DC pump power on the market is relatively small, and the maximum power is about 2KW-3KW. The solar AC pump power can reach more than 100 KW, and the power range is much wider than that of the DC pump. In terms of use, if the head and water demand are small, a DC pump can be selected.
