

# Solar power station 18 5mw generator set

## Overview

---

What types of generators does solar offer?

Solar offers factory packaged gas turbine-driven generator sets from 1-39 MW. These generator sets include industrial generators that are in compliance with DNV and ISO standards. Our standard power generation packages are suitable for operations in any environment.

What are Siemens Energy Generators used for?

Siemens Energy generators are designed for a wide range of industries and applications. These include utility-scale power generation in simple- and combined-cycle gas power plants; nuclear and other steam power plants; and industrial power generation for sectors such as chemicals, oil and gas, metals, and manufacturing.

What is a SGen generator?

The SGen series generators are engineered to withstand the rigors of industrial use to commercial power generators and are built to deliver high voltage power solutions, ensuring that your operations run smoothly and efficiently.

What is the power range of a SGen generator?

Our generators cover a power range of over 25 MVA. In addition, we provide wind generators from 0.25 to 10 MW. Our SGen series generators are specifically optimized for industrial applications, offering a robust power range up to 370 MVA. We understand the critical need for high-performance equipment that delivers uninterrupted power.
