

Solar water pump for greenhouse

Overview

What is the best solar watering system for a greenhouse?

The WaterMate Mini is designed for greenhouses up to 6 sq m, and the WaterMate Pro is perfect for greenhouses up to 40 sq m. It's a solar watering system that needs no mains power : 100% off grid. The powerful pump means you don't need a tap or garden hose, so it can run anywhere you have a water tank. If you have a tap, just leave out the pump.

Are solar water pumps environmentally friendly?

By harnessing solar energy, these pumps help decrease the consumption of fossil fuels and reduce greenhouse gas emissions, contributing to the fight against climate change. This makes solar water pumps an environmentally friendly choice that supports the transition to renewable energy.

How does a solar watering system work?

It's a solar watering system that needs no mains power : 100% off grid. The powerful pump means you don't need a tap or garden hose, so it can run anywhere you have a water tank. If you have a tap, just leave out the pump. It's smart, and saves water. It won't water when the soil is moist, and can water extra when you plants need more.

Are solar water pumps a good investment?

Solar water pumps have low operating costs, as they do not require fuel or electricity from the grid. This leads to significant savings on energy bills over time. In addition to the cost savings on energy, solar water pumps also have lower maintenance costs compared to traditional pumps.
