Why do we need energy storage systems in Spain?

Energy storage systems in Spain are a key element in the fight against climate change, as they help us to address the challenge of the energy transition. These systems make renewable energy production more flexible; and therefore help us to guarantee its integration into the Spanish electricity system.

What is thermal storage?

Thermal storage is the result of the accumulation of energy in materials that allow it to be retained and released in a controlled manner. Methods range from cooling by ice accumulation to exposure to extremely high temperatures. Like hydroelectric pumping and compressed air systems, this system is designed to store energy on a large scale.

Which country has the most energy storage systems in Europe?

With more than 20,000 megawatts, Spain is the country with the largest number of energy storage systems in Europe measured by power, and has the second largest number of projects: 128 in total; second only to Germany's 169.
