What is a VPV curtain wall?

The VPV curtain wall consists of a piece of CdTe-based PV laminate glass, an air cavity, and a sheet of vacuum glazing. The solar cells are etched into strips by lasers, and the transmittance of the VPV sample can be adjusted by changing the arrangement density of the strip solar cells.

What are exterior glass curtain walls?

Building exterior glass curtain walls serve as the interface between the indoor artificial environment and the outdoor natural environment, fulfilling the essential function of thermal insulation while also playing vital roles in providing daylighting and views .

Can partitioned design improve the performance of VPV curtain wall?

In summary, partitioned design method of the VPV curtain wall can improve the performance of the conventional VPV curtain wall with the same overall PV coverage. Fig. 17.
