

Spanish wind solar and solar container prices

Overview

Is wind power a good source of electricity in Spain?

Some of these data are still provisional so they may vary somewhat when they become definitive, but they will be small changes that will not affect the overall picture. As Red Eléctrica itself announced in December, wind power is once again the leading source of electricity generation in Spain with 23%.

How did European solar and wind power prices perform in July?

Solar and wind power production in Europe's five biggest markets was up 10% year over year in July, but eased slightly from all-time highs in June and May, allowing capture prices to recover, Platts Renewable Energy Price Explorer shows.

How did Spanish solar prices start in July?

Spanish prices started July in a bullish fashion, but windy weather and lower temperatures eased pressure in the second half of the month. The volume-weighted average for solar was pegged at Eur46.76/MWh, slightly below July 2024. The 67% capture rate for Spanish solar was the lowest across Europe in July.

What is the most important source of electricity in Spain?

As Red Eléctrica itself announced in December, wind power is once again the leading source of electricity generation in Spain with 23%. It is followed by nuclear and photovoltaic continues its unstoppable rise and is already the third most important source.
