

Styles of solar Panels

Overview

The six main types of solar panels are polycrystalline, monocrystalline, thin-film, transparent, solar tiles, and perovskite. What are the different types of solar panels?

Discover the six main types of solar panel, including thin-film, perovskite, and the best type for your home: monocrystalline. What kind of home do you live in?

When you're considering whether to get solar panels, it's a good idea to look into all the different types, to ensure you choose the best system for your home.

What type of solar panel should I choose?

The type of solar panel you should choose depends on the type of system you want to install. For a traditional rooftop solar panel system, you'll usually want monocrystalline panels due to their high efficiency. If you have a big roof with a lot of space, you might choose polycrystalline panels to save money upfront.

How do I choose the right type of solar panel?

Selecting the right type of solar panel involves analyzing several factors:
Available space : If space is limited, higher efficiency panels, such as monocrystalline, are ideal because they generate more energy per square meter.

What is the best type of solar panel?

The best type of solar panel is monocrystalline. They're more efficient than any other panel currently on the market, meaning you'll be making the best use of your roof space. And they have longer lifespans than all their competitors, which boosts their return on investment beyond that of polycrystalline panels or solar tiles.
