Overview

What does Sunroom do?

Sunroom handles the end-to-end leasing process for your home and gets it featured on Zillow, MLS, and the popular Sunroom Rentals app. Sunroom is your assistant in the background, doing all traditional real estate tasks. It's completely free to sign up.

Can a sunspace be used as a heater?

If its primary function will be heating, a sunspace with sloped glazing, few plants, little thermal mass, and insulated, unglazed end walls will get very hot on sunny winter days. In practice, sunspaces are rarely built to serve only as heaters, because there are less expensive ways to provide solar heat.

Can a sunspace be used as a greenhouse?

In practice, sunspaces are rarely built to serve only as heaters, because there are less expensive ways to provide solar heat. If the space will be a greenhouse, plants need fresh air, water, lots of light, and protection from extreme temperatures. Greenhouses consume.

What does a sunspace do?

Sunspaces serve three main functions -- they are a source of auxiliary heat, they provide space to grow plants, and they are pleasant living areas. The design considerations for these functions are very different, and building a sunspace that will serve all three functions requires compromises.
