## Overview

---

Can a supercapacitor charge a bus?

Supercapacitors have been used in buses, allowing times of 10-15 s to fully recharge the bus during a stop. But that needs to be combined with a high-voltage DC charging system. Automation company ABB has developed a high-capacity flashcharging electric bus system.

Can a supercapacitor electric bus be used in Hong Kong?

Development of a driving cycle for a supercapacitor electric bus route in Hong Kong Sustain Cities Soc, 48 ( 2019), 10.1016/j.scs.2019.101588 A green public transportation system using E-buses: a technical and commercial feasibility study Sustain Cities Soc, 51 ( 2019), 10.1016/j.scs.2019.101789.

Can a super-capacitor be used as energy storage?

In this paper the development of an electric bus with super-capacitors as unique energy storage is proposed. Super-capacitor has the advantage of quick charge.

How is supercapacitor bus implementation modeled in urban public transport?

Supercapacitor buses implementation was modeled in urban public transport. Influential energy demand factors recognized, assessed, surveyed and modeled. Model created in IGNITE validated with previous e-bus operation data. Referent driving style modeled to allow e-bus simulation on new dedicated lines.
