

# **Swedish power station generator**

## Overview

---

Öresundsverket is a modern, natural gas-fired power plant in Malmö with a capacity of 448 MW. Restored to operation by Uniper on behalf of Svenska kraftnät, the facility now strengthens Sweden's el.

What was the first hydropower plant in Sweden?

The first hydropower plant delivering electricity in Sweden was commissioned in 1882. The power was extracted with a dynamo (DC generator). The consumption had to be relatively close to the power plant because the rated voltage was low and the transmission losses were relatively high.

Are old hydropower generators in service in Sweden?

Among Swedish hydropower generators a large variety of designs exist. As one part of the potential upgrading of the hydropower in Sweden a better understanding and description of the old hydropower generators in service is needed.

How does hydropower work in Sweden?

Hydropower has historically contributed to the bulk of the electricity production in Sweden for more than a century. The first hydropower plant delivering electricity in Sweden was commissioned in 1882. The power was extracted with a dynamo (DC generator).

How many hydro power plants are there in Sweden?

Sweden generates hydro-powered energy from 142 hydro power plants across the country. In total, these hydro power plants has a capacity of 12822.9 MW. What is hydropower?

Hydropower, also known as hydroelectric power, is a form of renewable energy that generates electricity by harnessing the power of moving water.
