

Switchgear equipment in China in Turkey

Overview

What is switchgear & how does it work?

Switchgear is a term used to describe electrical equipment specially designed to protect the electrical system from high voltage. There are a variety of switching devices, including circuit breakers, fuses, and disconnectors. It can be divided into two parts, switches and fuses.

What are the different types of switchgear?

There are three basic types of switchgear: An automatic transfer switch (ATS) is a device that automatically transfers power from one circuit to another when current is interrupted in the first circuit. ATSS, electric motors, heaters, air conditioners etc. It is used to prevent critical loads from being damaged by overload conditions.

Who makes Russian type composite switch?

Russian type composite switch CNKEEYA, a distinguished manufacturer based in China, specializes in the production of cutting-edge Indoor High Voltage composite Switches. With a state-of-the-art factory, KEEYA has established itself as a leading player in the electrical equipment industry.

What is MSG switchgear?

MSG is a type of electrical switchgear that uses mechanical switches to control power instead of using electronic components such as fuses and circuit breakers. The primary reason for choosing manual switches is that they are much cheaper than electronic switches. This makes them perfect for industrial applications where cost is a key factor.
