Overview

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

Are battery energy storage systems essential grid infrastructure?

Battery energy storage systems (BESS), once seen as promising add-ons to renewables, are now considered essential grid infrastructure—tested during blackouts, storms, and surging demand curves. One of the clearest trends shaping this change is the prioritization of availability over capacity.

Does Tesla have a battery storage business?

Tesla has been growing its energy storage business in recent years. Established as a key player in the electric automotive industry, it has diversified its offerings to include battery storage — now one of its strongest offerings. Tesla Energy's energy storage business has never been better.

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.
