Do battery energy storage systems look like containers?

C. Container transportation Even though Battery Energy Storage Systems look like containers, they might not be shipped as is, as the logistics company procedures are constraining and heavily standardized. BESS from selection to commissioning: best practices<sup>38</sup> Firstly, ensure that your Battery Energy Storage System dimensions are standard.

What should be included in a contract for an energy storage system?

Several points to include when building the contract of an Energy Storage System:

- Description of components with critical technical parameters: power output of the PCS, capacity of the battery etc.
- Quality standards: list the standards followed by the PCS, by the Battery pack, the battery cell directly in the contract.

When does an energy storage project start?

“The operations and maintenance phase of an energy storage project begins when the system has been successfully commissioned and the owner has obtained approval to operate the system.

Should you agree on an energy storage system contract?

Agreeing on a contract can be time-consuming and nerve breaking. This report is not a reference legal paper but can give a few tips to look at when contractualization of an Energy Storage System contract.
