

# **Tehran Energy Storage Power Station Decay Period**

## Overview

---

This paper conducts a joint life-cycle costing and life-cycle assessment to address the cradle-to-gate energy, cost, and midpoint/endpoint environmental impacts of Tehran's electricity generation/supply.

Does diesel phase-out reduce electricity supply impacts in Tehran?

Diesel phase-out substantially reduces electricity supply impacts in Tehran. This paper conducts a joint life-cycle costing and life-cycle assessment to address the cradle-to-gate energy, cost, and midpoint/endpoint environmental impacts of Tehran's electricity generation/supply industry.

What are the environmental impacts of electricity generation & supply in Tehran?

The majority of the environmental impacts of electricity generation and supply in Tehran are attributed to fossil power plants, with CCs being the main contributor.

Which is the most sustainable electricity generation technology in Tehran?

Hydropower plants Reservoir hydropower is the most sustainable electricity generation technology in the electricity mix of Tehran. In addition to having the lowest midpoint and endpoint environmental impacts, hydropower plants impose the lowest energy and NPC over the life cycle.

What are the problems with the electricity system in Tehran?

The bigger problem with the electricity system in Tehran is the demand-supply gap, which culminates in frequent blackouts with surging residential electricity consumption during the hot seasons (Masoomi et al., 2022).
