

# The first new energy storage will be proposed

## Overview

---

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

Why is China moving to a new type of energy storage?

The move is part of China's broader push toward a green, low-carbon energy transition as well as high-quality economic and social development. It builds on significant growth in the sector. As of the end of 2024, the country's installed capacity of new-type energy storage had reached 73.76 million kilowatts, according to official data.

What is the future of energy storage in China?

The new energy storage market in China has great development potential in the future. The cumulative installed capacity of new energy storage in China is expected to exceed 100 gigawatts (GW) by 2025, according to the Energy Storage Industry Research White Paper 2025 released by the Institute of Engineering Thermophysics on 10 April.

Will China install 100 GW of new energy storage by 2027?

From ESS News China aims to install more than 100 GW of new energy storage – primarily battery storage, excluding pumped hydro – by 2027, according to a new action plan presented by authorities on Friday.

## The first new energy storage will be proposed

---

INSIGHT: China new energy storage capacity ...

Apr 14, 2025 · China new energy storage capacity more than double by 2030 China new energy storage capacity at 73.76 million kW/168 million kWh ...

---

INSIGHT: China new energy storage capacity to surge by 2030

Apr 14, 2025 · China new energy storage capacity more than double by 2030 China new energy storage capacity at 73.76 million kW/168 million kWh by the end of 2024 Policy support ...

---

UK Flow Battery To Be Tested In US

1 day ago · Vanadium flow battery technology from the UK will be the first to go through its paces at a new energy storage test facility in the US.

---

China leads the world in new-type energy storage capacity

Sep 12, 2025 · "China's advances in new-type energy storage are moving from isolated breakthroughs to a more systematic framework," said Rao Hong, chief scientist at China ...

---

New energy storage key to spur economy

May 6, 2025 · Bian said the administration will further promote the orderly development of new energy storage technology, while vigorously supporting technological innovation, continuing to ...

---

New energy storage key to spur economy

May 6, 2025 · Bian said the administration will further promote the orderly development of new energy storage technology, while vigorously ...

---

China leads in new energy storage capacity and might reach ...

Apr 19, 2025 · 2024 was a year of accelerated energy transformation in China. For the first time, installed capacity of renewable energy exceeded that of thermal power, accounting for 56% of ...

---

China targets 180 GW of new energy storage ...

Sep 12, 2025 · As of June 2025, China's new energy storage fleet had surpassed 100 GW, overtaking the pumped hydro additions for the first ...

---

New-type energy storage poised to fuel China's growth

2 days ago · China's installed capacity of new-type energy storage exceeded that of pumped storage for the first time at the end of 2024, according to a recent data release by China ...

---

China unveils three-year action plan to boost new-type energy storage

Sep 12, 2025 · China on Friday unveiled an action plan to promote the development of new

forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...

---

New energy storage welcomes major opportunities, and 3-5 ...

Nov 8, 2024 · The development of new energy storage has ushered in another "reassuring needle". On the evening of November 6, the Ministry of Industry and Information Technology ...

---

CNESA Major Release on the 10th Western China Energy Storage ...

Aug 20, 2025 · The share of pumped storage has fallen below 40% for the first time, while new energy storage represented by lithium-ion batteries has achieved leapfrog growth. In addition, ...

---

China targets 180 GW of new energy storage by 2027 in ...

Sep 12, 2025 · As of June 2025, China's new energy storage fleet had surpassed 100 GW, overtaking the pumped hydro additions for the first time, according to data from the China ...
