

# The inventory of solar inverters is so high

## Overview

---

Which company makes the best solar inverter?

Huawei is a world-renowned company when it comes to solar PV inverters. Founded in 1987, it has become one of the leading global providers in this field. In 2019, Huawei's SUN2000 smart inverter series was awarded as one of the three winners of the Intersolar AWARD.

What are the best techniques for solar inventory management?

The best techniques for solar inventory management are the Reorder point formula, Consignment and Safety Stock. Solar Inventory includes inventory management of solar modules, solar cells, PV materials, solar paste, silicon wafers, frames, backsheets, junction boxes, PV glass, PV Equipment, PV connectors and racking & mounting.

What happens if solar inventory is too high?

Excess solar inventory can very quickly be made obsolete by new technology. Solar inventory can also get devalued because of frequent price drops. Sales cycles are not very predictable because demand is closely linked to consumers' energy bills, price volatility and incentives provided by governments.

Why is solar inventory management so difficult?

The volatile nature of the solar industry makes Solar Inventory management a challenging task. Excess solar inventory can very quickly be made obsolete by new technology. Solar inventory can also get devalued because of frequent price drops.
