

The largest power station generator

Overview

What is the largest power generating facility ever built?

As of 2025[update], the largest power generating facility ever built is the Three Gorges Dam in China, completed in 2012. The facility generates power by utilizing 32 Francis turbines for a total capacity of 22,500 MW. The eight largest power stations are also hydroelectric dams, beginning with Baihetan Dam, at 16,000 MW, also in China.

What is the largest power station in the world?

At all times since the early 20th century, the largest power station in the world has been a hydroelectric power plant. More information Held record, Name of power station . More information Rank, Station . 1.

What is the most powerful power plant in the world?

The Chinese Three Gorges hydroelectric power plant, built on the Yangtze River in 2003, is the most powerful in the world. Its maximum capacity is an impressive 22,500 MW, which puts it far ahead of the rest of the planet's stations. By comparison, Russia's most potent power plant, the Sayano—Shushenskaya HPP, has a capacity of only 6,400 MW.

What is the biggest hydropower plant in the world?

The 22.5GW Three Gorges hydroelectric power plant in Yichang, Hubei province, China, is the world's biggest hydropower station. It is a conventional impoundment hydropower facility exploiting the water resource of the Yangtze River.

The largest power station generator

List of largest power stations explained

Apr 1, 2025 · This article lists the largest power stations in the world, the ten overall and the five of each type, in terms of installed electrical capacity. Non-renewable power stations are those ...

China's Three Gorges dam generates 1,600 ...

Jul 10, 2023 · The world's largest hydropower project, China's Three Gorges Hydroelectric Power Station on the Yangtze River has generated over ...

List of largest power stations

This article lists the largest power stations in the world, the ten overall and the five of each type, in terms of installed electrical capacity. Non-renewable power stations are those that run on coal, ...

China's Fengning Station: World's Largest ...

Nov 18, 2025 · The Fengning pumped storage hydropower plant in Hebei province (courtesy: State Grid Corporation of China) China has set a new ...

Top 10 Biggest Hydroelectric Power Plants in ...

Oct 14, 2013 · The 10 Biggest Hydroelectric Power Plants What are the biggest hydroelectric power plants in the world? Three Gorges, China - ...

The largest power plants in the world

The wind farm began construction in 2009, and new generators are still being added. It consists of 40 separate stations along the Gobi Desert, where very strong winds blow. The complex in ...

ELECTRICITY: The Three Gorges Dam, World's ...

The Three Gorges Dam has been the world's largest power station in terms of installed capacity (22,500 MW) since 2012. The dam generates an ...

ELECTRICITY: The Three Gorges Dam, World's Largest Power Station

The Three Gorges Dam has been the world's largest power station in terms of installed capacity (22,500 MW) since 2012. The dam generates an average 95 ± 20 TWh of electricity per year, ...

Top 10 Biggest Hydroelectric Power Plants in the World

Oct 14, 2013 · The 10 Biggest Hydroelectric Power Plants What are the biggest hydroelectric power plants in the world? Three Gorges, China - 22.5GW The 22.5GW Three Gorges ...

What Is The Biggest Generator? An Analysis of Megastructures

May 8, 2024 · The world's largest power generators stand as testaments to human ambition

and the quest for sustainable energy solutions. From hydroelectric dams harnessing the power of ...

List of largest power stations

This article lists the largest power stations in the world, the ten overall and the five of each type, in terms of installed electrical capacity. Non ...

Power players: the world's biggest power stations
