

# **The largest single solar container battery**

## Overview

---

Chinese solar and storage giant Sungrow has unveiled a new energy storage platform, PowerTitan 3.0, boasting the world's largest single-cabinet capacity at 12.5 megawatt-hours (MWh), surpassing CATL's 9 MWh system launched just last month. What is Blythe/McCoy/Arlington battery energy storage?

Rated Power: 812 MW Energy: 3248 MWh The Blythe/McCoy/Arlington battery energy storage project (often abbreviated as BAM) is a portfolio of large co-located battery systems at NextEra Energy's solar power facilities in eastern Riverside County, California.

What are Blythe/McCoy/Arlington solar batteries?

These batteries are integrated with three adjacent solar photovoltaic complexes - the Blythe Solar Power Project, the McCoy Solar Energy Center, and the Arlington Solar Energy Center. As of 2025, the entire Blythe/McCoy/Arlington storage portfolio is operational and providing resource adequacy and energy-shifting services to the CAISO grid.

How many battery enclosures does Nova Power Bank have?

The project area encompasses 43 acres with about 1,200 battery enclosures. The storage capacity at Nova powers Southern California Edison, Peninsula Clean Energy, and San Diego Gas & Electric. Constructed under a project labor agreement, Nova Power Bank is constructed by Mortenson and includes 1,200 battery containers supplied by BYD.

How many batteries can a factory produce a day?

The factory's production line can achieve an average output of 1.5 battery cells per second from material feeding to finished batteries; it completes four entire battery packs in one minute and produces over 40 containers of 5MWh daily.
