

# The service life of solar power generation of Southeast Asian solar container communication station batteries

## Overview

---

Does Southeast Asia have a solar future?

By Fidelis Eka Satriastanti, Tyler Roney and Soraya Kishtwari Dialogue Earth looks at Southeast Asia's evolving landscape of solar energy adoption, from achievements to hurdles and future aspirations. Sunny Southeast Asia has made significant strides in solar energy, with solar farm capacity exceeding 20 gigawatts (GW) across ASEAN countries.

Does South East Asia have a solar PV market?

The South East Asia region is an emerging photovoltaic market at its early-stage growth. ASEAN countries are expected to have substantial growth in solar PV deployment. The PV market in the ASEAN region has not evolved into a solid, self-sustaining PV market. Hence there is a necessity for policies and support mechanisms in ASEAN countries. Fig. 1.

Will Southeast Asia install a PV system in 2022?

Moreover, it is forecasted that the Southeast Asia region is going to install another 27 GW of PV capacity between 2021 and 2025 . The development and government support toward PV system installation has been summarized the Table 1 below. Fig. 2. ASEAN market cumulative PV system installation in 2022 . Table 1.

Are there support mechanisms for solar PV development in ASEAN countries?

ASEAN countries are expected to have substantial growth in solar PV deployment. The PV market in the ASEAN region has not evolved into a solid, self-sustaining PV market. Hence there is a necessity for policies and support mechanisms in ASEAN countries. Fig. 1. Different types of support mechanisms for solar PV development. 3.1.

## The service life of solar power generation of Southeast Asian solar
