

# The three major telecom operators selectively shut down 5g base stations

## Overview

---

Which telecom operators are best suited for 5G deployment?

NEW DELHI: Telecom operators are best suited for the end-to-end deployment of private 5G networks and for managing the related infrastructure due to their years of expertise in building networks, said top executives of India's top carriers Reliance Jio and Vodafone Idea.

Does China have a 5G base station?

Earlier this year, industry calculations indicated that China's 5G base stations -- the relay point between mobile phones and the larger internet -- accounted for more than 60 percent of the global total, highlighting the country's leading position in 5G deployment worldwide.

What role do MNOs play in China's 5G development?

Chinese Mobile Network Operators (MNOs) play a significant role in China's 5G development, especially in the current stage of 5G commercialization. In addition, the Chinese government issued China Broadnet a 5G license, which may change the competitive landscape of MNOs.

Which country is leading 5G development worldwide?

With the biggest 5G market and largest 5G mobile network, China is leading 5G development worldwide. Chinese Mobile Network Operators (MNOs) play a significant role in China's 5G development, especially in the current stage of 5G commercialization.
