

# **Timor-Leste wind-solar hybrid power generation system**

## Overview

---

What is the Timor-Leste solar power project?

The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh battery energy storage system. This will be the country's first full-scale renewable energy IPP project.

What is Timor-Leste's energy plan?

Program of the 9th Constitutional Government: The Government is committed to modernize and expand its energy system by utilizing renewable energy. Timor-Leste plans to implement 72 MW solar and 50 MW wind by 2024 and 2026 respectively. This will increase RE share in power generation from 0.2% in 2021 to 35.4% in 2030.

What will Timor-Leste's energy policy look like in 2021?

Timor-Leste plans to implement 72 MW solar and 50 MW wind by 2024 and 2026 respectively. This will increase RE share in power generation from 0.2% in 2021 to 35.4% in 2030. Under the current policies, GHG emission from the energy sector are expected to drop by 30% by 2030, compared to the BAU level.

Are solar panels a good idea for Timor-Leste?

The Ambassador of Japan to Timor-Leste, H.E. KIMURA Tetsuya, in his remarks, shared: "I understand that solar panels are extremely helpful. Every time I walk around and see solar panels installed, I feel very happy and encouraged by this visible progress. It's exciting to witness this kind of development taking place."

## Timor-Leste wind-solar hybrid power generation system
