

# **Transparent fast charging portable power bank**

## Overview

---

What is a portable power bank charger?

A portable charger power bank, such as the myCharge Solar Charger Portable Power Bank - PowerFold 8000 mAh, features fold-out solar panels and is designed to recharge your cell phone and USB devices in the wild and while camping. (See images and packaging for charging requirements and instructions.).

Does a power bank have pass-through charging?

Pass-through charging is a handy feature on both power banks and USB-C hubs. But it's not perfect, particularly on power banks. According to RavPower, a power bank and charger manufacturer, excess heat is an enemy of the lithium-ion batteries used in power banks.

Do power banks charge faster?

Yes—some power banks charge much faster than others. It depends on their wattage output and whether they support modern charging standards like USB-C Power Delivery (PD). A 65W or 140W power bank, like Anker's offerings, will charge your devices significantly faster than a basic 18W model.

Does a 20W power bank count as fast charging?

Yes, a 20W power bank counts as fast charging—especially for smartphones. It's powerful enough to charge most iPhones and Android phones to around 50% in about 30 minutes (if your device supports fast charging).
