What are the different types of switchgear?

There are three basic types of switchgear: An automatic transfer switch (ATS) is a device that automatically transfers power from one circuit to another when current is interrupted in the first circuit. ATs, electric motors, heaters, air conditioners etc. It is used to prevent critical loads from being damaged by overload conditions.

What is switchgear & how does it work?

Switchgear is a term used to describe electrical equipment specially designed to protect the electrical system from high voltage. There are a variety of switching devices, including circuit breakers, circuit breakers, fuses, and disconnectors. It can be divided into two parts, switches and fuses.
