

UPD Industrial Uninterruptible Power Supply

Overview

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) can support power-heavy devices and ensure sustained access to a power supply in the event of a power outage. During power failures, an industrial UPS power backup can provide critical infrastructure with enough power to operate and backup data until the restoration of the main power supply.

What is an industrial UPS system?

The industrial UPS systems produced by SCU, a professional UPS supplier, are specially designed for industrial application with high performance, high efficiency and high protection level. The industrial UPS system provides uninterrupted high-quality industrial uninterruptible power supply for modern manufacturing.

What is a chloride uninterruptible power supply (UPS) system?

Chloride's uninterruptible power supply (UPS) systems are installed in hazardous, safety critical industrial environments that operate the heaviest of heavy machinery and are often found in challenging locations, such as offshore drilling platforms.

How do I Choose an uninterruptible power supply for DC applications?

Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select the ideal AC UPS and ensure superior system availability.
