

# **UPS uninterruptible power supply delivery time**

## Overview

---

What is a UPS (uninterruptible power supply)?

A UPS (Uninterruptible Power Supply) is an emergency power system that provides backup power when the main source of power is lost. It gives businesses valuable time to safely power down machinery or keep critical systems online until backup generators kick in.

How long does an uninterruptible power supply last?

The estimated run time is 20 minutes. By going through the above formula, you can get the approximate runtime of the uninterruptible power supply. Even though it is a simple formula, there are many factors to consider including the type of battery. For extending the runtime, the battery must be charged regularly.

What can change ups operation time?

Many things can change ups operation time. Key factors impact uninterruptible power supply time include battery capacity, battery age and condition, load power consumption, UPS efficiency and environmental conditions.

What is a ups & how does it work?

A UPS is a device that keeps your devices running when the power goes out; it acts as a backup power source, ensuring your equipment stays on during outages or power drops. How do you calculate UPS operation time?

## UPS uninterruptible power supply delivery time
