

USA New York Home Emergency Energy Storage

Overview

Are battery energy storage facilities safe in New York?

Yes. New York is home to 6,000+ battery energy storage facilities. Fires at these facilities are rare, and developers and regulators in New York have already begun taking steps to mitigate risks by implementing enhanced safety protocols and emergency response plans - and reviewing and updating existing fire codes.

What is New York state's energy storage plan?

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers.

How many battery energy storage projects are there in New York?

There are 5,000+ existing battery energy storage projects in New York, storing 340.70 MW of clean energy that has bolstered grid resiliency for local communities. (Source: NYSERDA) Read on about the great improvements battery energy storage facilities are making to our electricity grids.

What is New York's energy storage roadmap?

The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the State and bolster grid reliability and customer resilience.
