

# Ukraine solar air conditioning

## Overview

---

Why is solar power important in Ukraine?

Solar power, as the most easily deployable clean energy source, has been key to supporting Ukraine in times of crisis, helping to maintain energy access amid disruptions. Solar power will be crucial for rebuilding the country, ensuring lasting energy security.

How much solar power does Ukraine have in 2024?

Figures from the Solar Energy Association of Ukraine (SEAU) earlier this year showed that the country added around 850MW of solar PV capacity in 2024, the majority of which came from self-consumption systems installed by businesses. It's "become a trend", Semenyshyn says.

Did Ukraine install 22 solar PV projects during wartime?

Walburga Hemetsberger, CEO of SolarPower Europe (she/her) said; "I commend Energy Act for Ukraine on their achievement of installing 22 solar PV projects in Ukraine during wartime. These projects provide stable electricity to hospitals and schools, helping people and offering a ray of hope.

Why are Ukrainian businesses turning to self-consumption solar PV systems?

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.
