

# Uninterrupted power supply for small solar container communication stations in Switzerland

## Overview

---

This research presents the architectural design and implementation of a solar photovoltaic-based uninterruptible power supply (Solar UPS) that synergistically integrates solar energy harvesting, energy storage, and real-time load management to ensure uninterrupted AC power delivery. Are solar-based UPS systems sustainable?

The findings suggest that solar-based UPS systems offer a sustainable and cost-effective solution for continuous power supply, contributing to energy resilience and environmental sustainability. Keywords: : Solar energy, uninterruptible power supply, photovoltaic panels, battery storage, renewable energy, power continuity.

What is a solar-powered uninterruptible power supply (UPS) system?

The design and execution of a solar-powered uninterruptible power supply (UPS) system are presented in this study. The system integrates photovoltaic (PV) panels, a battery storage unit, and an inverter to ensure a seamless power supply during grid failures.

How many UPS & battery systems have been installed in Switzerland?

More than 30'000 UPS and battery systems have been successfully delivered, installed and are in operation at more than 3'000 clients in more than 100 countries. This success is based on traditional Swiss values that focus on technical excellence and quality in all areas of operation. We welcome you to be part of it.
