

Uninterruptible power supply UPS replaces large capacity battery

Overview

Do you need an uninterruptible power supply (UPS)?

A power failure is more than an inconvenience—it can knock out essential equipment for hours on end. If you have important electronics that have to keep running when the power's out, you'll need an uninterruptible power supply (UPS). Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day.

What is an uninterruptible power supply?

An uninterruptible power supply (UPS) ensures that devices such as computers, servers, and telecommunication systems continue operating even when the main power supply is interrupted. It provides not only power backup but also protection against voltage spikes, surges, and fluctuations.

How long does an uninterruptible power supply battery last?

Uninterruptible power supply lithium ion battery systems often last over 10 years, far outpacing traditional batteries, while offering higher energy density and reduced maintenance. When selecting a UPS system, consider factors like capacity, runtime, and design to match your needs.

Which APC UPS battery backup surge protector is right for You?

For those seeking a budget-friendly option, the APC UPS Battery Backup Surge Protector BE425M offers fantastic value without compromising on essential features. With a 425VA/225W capacity, it provides enough power to safely shut down computers and small electronics during outages.
