What is an uninterruptible power supply?

Uninterruptible Power Supply, often referred to as UPS, protects your business from blackouts and other power problems so that your equipment stays up and running when you need it most. [.].

What is an ups & how does it work?

An UPS is a device that supplies power to connected devices for a certain period of time in the event of a power failure due to a power failure. It has a built-in battery and supplies power to servers, PC electronic equipment, network equipment, etc. in the event of power failure or power supply trouble, for example.
