

Victoria solar Energy Storage

Overview

The Victoria government in Australia has approved a 300MW/1,200MWh battery energy storage system (BESS) in Gippsland and a 332MW solar PV power plant with integrated storage in the state's northeast region, via the Development Facilitation Program. Does Energy Vault provide energy storage in Australia?

Energy Vault, which also provides a proprietary gravity energy storage technology, has been employed by several developers for energy storage sites in Australia. This includes Acen Australia, which confirmed that Energy Vault would provide a 400MWh BESS for the New England project in New South Wales.

How much does a solar PV project cost?

It is estimated to cost around AU\$370 million (US\$240 million) to develop fully and is being constructed around 300km northwest of the state capital, Melbourne, in Horsham. In a LinkedIn post, the SEC confirmed that work has started on installing the solar PV, with pre-construction having commenced in February.

When will solar PV be fully operational?

In a LinkedIn post, the SEC confirmed that work has started on installing the solar PV, with pre-construction having commenced in February. The site is expected to be fully operational in 2027. This article first appeared on our sister site, Energy-Storage.news. You can read the full version here.

Which energy storage system integrator will supply the Bess?

As reported previously by Energy-Storage.news, energy storage system integrator Energy Vault will supply the BESS. The system will be built using the company's X-Vault integration platform and its UL9540 and AS3000-certified B-VAULT integrated BESS enclosures.
