Is Trina Solar a good choice for Vietnam?

“Trina Solar modules use dual-glass, useful for challenging environments like these where proximity to the sea means higher humidity and salt spray,” says Wang. “Solar energy is the right choice for Vietnam because it's proven technology that can be quickly and readily deployed, even in challenging sites,” she adds.

What will Vietnam's power development plan look like in 2050?

Under Vietnam's Power Development Plan VIII, the country is looking to phase out coal-fired power generation by 2050 and increase solar power installed capacity to account for 34%, up from 23% in 2022. The Power Development Plan also forecasts that energy storage will increase to 300 MWh by 2030 and 26 GWh by 2050.

Is solar energy the right choice for Vietnam?

“Solar energy is the right choice for Vietnam because it's proven technology that can be quickly and readily deployed, even in challenging sites,” she adds. Vietnam's transition to renewable energy comes as the country's electricity needs continue to increase due to strong economic growth projected at 5-7% per annum over the coming years.

Which solar projects are powered by Trina Solar vertex?

Utility-scale projects powered by Trina Solar Vertex modules include the 51MW Dam Tra O floating solar farm, in the central coastal province of Binh Dinh, and the 49MW Vinh Long ground-mounted solar farm near the southern tip of Vietnam.
